PITT MED PROFESSIONALISM ACCOLADE

JULIA BULOVA

MS3 Student

"We had a patient with a history of pilocytic astrocytoma, status post recent fenestration procedure, with a VP Strata shunt in place. Given concerns for shunt failure, we obtained an MRI shunt series. While I was managing other patients, Julia independently reviewed the MRI, identified a possible subdural hemorrhage, and promptly brought it to my attention. Neurosurgery later confirmed the finding and took the patient to the OR for a burr hole procedure to evacuate the SDH. Her keen observation and initiative were truly commendable. I believe she deserves All-Star recognition for her efforts."
