Pitt Med Professionalism Accolade

CONGRATULATIONS!

Ahmed Humza, MD

PGY4 Resident
Department of Neurology

Humza went above and beyond for the expectations of teaching and creating a fantastic learning environment while on neurology service. He spent time to cover topics relevant to medical students and would utilize the Socratic method to truly ensure we would understand the content he covered. By far the best teacher I have encountered during my rotations and will be a fantastic physician-educator in the future. I am able to conduct the neurological exam and even elicit some more subtle examination findings strictly because of his dedication.
