Pitt Med Professionalism Accolade

CONGRATULATIONS!

Jessica Lee, MD

Fellow
Department of Critical Care Medicine

Dr. Lee is a consummate professional who went above and beyond to make medical students feel welcome and valued in the ICU. She treated medical students as peers and demonstrated a vested interest in medical student learning. While the critically ill and injured patient can pose a daunting task for students to manage, Dr. Lee did an excellent job describing how to establish priorities and develop reasonable treatment plans. Dr. Lee was a joy to work with and stands as an outstanding example of how residents and fellows should mentor medical students.
