Pitt Med Professionalism Accolade

CONGRATULATIONS!

Alberta Negri Jimenez, MD

PGY1 Resident
Department of Medicine

There was several days during my rotation in the MICU where some member of the team or another had a bad day and struggled on rounds or felt overwhelmed. Alberta was attentive to those challenges, despite being just as busy as the rest of us. She was always the first to check in with a team member who was upset and took time to listen and support. She did it subtly and tactfully but it was noticed and appreciated…Alberta always heard what I had to say and supported me...This small thing went a long way and was a clear example of how compassionate and caring Alberta is not just for patients, but for colleagues as well.
